Brand guide

A shared visual language for Chicken Balls Records.
Purple and green lead the identity. Yellow, red and blue expand the palette for artwork, campaigns and the animated website.

The existing logo

Use the original vector silhouette.
Keep its proportions and clear space.
Use purple, green, black or white.

Primary colors

VIVID VIOLET

#6322F2

RGB 99 34 242

COOL GREEN

#34C978

RGB 52 201 120

Typography

Chicken Balls custom font for expressive display headings.
Funnel Sans for body copy, controls, track names and footer.
Funnel Display ExtraBold for the title-case website headline.

Extended palette

Golden yellow brings warmth alongside the cooler green.
Midpoint red retains coral warmth; blue adds a crisp, cool accent.
Use extended colors as accents rather than replacing the core pair.

Golden yellow

#FFC42E / RGB 255 196 46

Warm highlights and strong contrast with green

Midpoint red

#F94A40 / RGB 249 74 64

Energy and expressive accents

Blue

#2563EB / RGB 37 99 235

Cool transitions and supporting fields

Readable text pairings

Use near-white on purple and blue. Use near-black on green,
yellow and red. These pairings exceed 4.5:1 contrast.

Violet	Green	Yellow	Red	Blue
6.42:1	8.85:1	11.95:1	5.51:1	4.81:1

Ratios use #F7F7F2 and #101010. Test text over moving backgrounds separately.

Type and logo system

Chicken Balls custom display font

OUR MUSIC

Use for section headings, campaign titles and expressive artwork.
Use the finished ChickenBallsFont.ttf; do not stretch the letterforms.

Funnel Sans / Funnel Display

Chicken Balls Records

independent electronic music label

Aa Bb Cc 0123456789 ! ? & /

Funnel Sans: Regular 400 body, Medium 500 and Semibold 600 UI.
Bold 700 for emphasis. Funnel Display ExtraBold 800 for the hero.

Logo use

Use SVG for the website and scalable artwork. Leave at least one logo tile of clear space around the mark. Do not redraw, skew, add effects to, or crop the standalone logo.

Mosaic behavior

A uses two floating blooms with the original sound response.
They morph between clover and organic forms mostly on the right.
Bass expands their centres; high notes ripple around the edges.
B uses flowing rows and music-driven expansion. Keep all tiles opaque and saturated. Do not add feathering or gradients.

Header text stays near-white in light and dark themes.

Screen palette in sRGB. Proof print colors with the printer before production.

Rectangles, consistently

Use squares and rectangles with sharp corners, or rectangles with the same radius on all four corners. Pills are allowed.
Do not use leaf shapes or alternating corner radii.

Sharp rectangle

Rounded rectangle

Pill

Website application

Featured release play button: a 10 px radius on every corner.
Release and player cards: use the shared 28 px brand radius.
Small controls: consistent rounded corners or sharp rectangles.
Artwork stays square. Leave clear space around the standalone logo.

Recognizable platform marks

Use the standard service logos for streaming and social links.
Keep their original silhouettes and add accessible service labels.
These marks are content, not UI container shapes.
Platform links change color on hover and retain keyboard focus.

Editable pixel icon archive

Original custom icons are preserved as individual SVG files in assets/icons/pixel-backup/. They remain available for future reuse.
